

**Airplane Design Part II:
Preliminary Configuration design and Integration of the Propulsion System
Table of Contents**

TABLE OF SYMBOLS
ACKNOWLEDGEMENT

1. INTRODUCTION
2. STEP-BY-STEP GUIDE TO CONFIGURATION DESIGN
 - 2.1 PRELIMINARY DESIGN SEQUENCE I
 - 2.2 PRELIMINARY DESIGN SEQUENCE II
3. SELECTION OF THE OVERALL CONFIGURATION
 - 3.1 EXAMPLES OF EXISTING CONFIGURATIONS
 - 3.1.1 Homebuilts
 - 3.1.2 Single Engine Propeller Driven Airplanes
 - 3.1.3 Twin Engine Propeller Driven Airplanes
 - 3.1.4 Agricultural Airplanes
 - 3.1.5 Business Jets
 - 3.1.6 Regional Turbopropeller Driven Airplanes
 - 3.1.7 Jet Transports
 - 3.1.8 Military Trainers
 - 3.1.9 Fighters
 - 3.1.10 Military Patrol, Bomb and Transport Airplanes
 - 3.1.11 Flying Boats, Amphibious and Float Airplanes
 - 3.1.12 Supersonic Cruise Airplanes
 - 3.2 UNUSUAL CONFIGURATIONS
 - 3.2.1 Canard and Tandem Wing Configurations
 - 3.2.2 Joined Wing Configurations
 - 3.2.3 Three Surface Configurations
 - 3.2.4 Double Fuselage Configurations
 - 3.2.5 Flying Wings
 - 3.2.6 Burnelli Configurations
 - 3.2.7 Oblique Wing Configurations
 - 3.2.8 The Roadable Airplane
 - 3.3 OUTLINE OF CONFIGURATION POSSIBILITIES
 - 3.3.1 Overall Configuration
 - 3.3.2 Fuselage Configuration
 - 3.3.3 Engine Type, Number of Engines and Engine Disposition
 - 3.3.3.1 Engine type
 - 3.3.3.2 Number of engines
 - 3.3.3.3 Engine disposition
 - 3.3.4 Wing Configuration
 - 3.3.5 Empennage Configuration
 - 3.3.6 Landing Gear Type and Disposition
 - 3.4 A PROCEDURE FOR SELECTING THE OVERALL CONFIGURATION
 - 3.5 EXAMPLE APPLICATIONS
 - 3.5.1 Twin Engine Propeller Driven Airplane
 - 3.5.2 Jet Transport
 - 3.5.3 Fighter
4. DESIGN OF COCKPIT AND FUSELAGE LAYOUTS
 - 4.1 A PROCEDURE FOR THE DESIGN OF COCKPIT AND FUSELAGE LAYOUTS
 - 4.2 EXAMPLE APPLICATIONS
 - 4.2.1 Twin Engine Propeller Driven Airplane
 - 4.2.2 Jet Transport
 - 4.2.3 Fighter
5. SELECTION AND INTEGRATION OF THE PROPULSION SYSTEM
 - 5.1 SELECTION OF PROPULSION SYSTEM TYPE
 - 5.2 SELECTION OF THE NUMBER OF ENGINES AND THE POWER OR THRUST LEVEL

**Airplane Design Part II:
Preliminary Configuration design and Integration of the Propulsion System
Table of Contents**

- 5.3 INTEGRATION OF THE PROPULSION SYSTEM
- 5.4 EXAMPLE APPLICATIONS
 - 5.4.1 Twin Engine Propeller Driven Airplane
 - 5.4.2 Jet Transport
 - 5.4.3 Fighter
- 6. CLASS I METHOD FOR WING PLANFORM DESIGN AND FOR SIZING AND LOCATING
 - 6.1 A PROCEDURE FOR WING PLANFORM DESIGN AND FOR SIZING AND LOCATING LATERAL CONTROL SURFACES
 - 6.2 EXAMPLE APPLICATIONS
 - 6.2.1 Twin Engine Propeller Driven Airplane
 - 6.2.2 Jet Transport
 - 6.2.3 Fighter
- 7. CLASS I METHOD FOR VERIFYING CLEAN AIRPLANE CL_{max} AND FOR SIZING HIGH LIFT DEVICES
 - 7.1 A PROCEDURE FOR DETERMINING CLEAN AIRPLANE CL_{max} AND FOR SIZING HIGH LIFT DEVICES
 - 7.2 EXAMPLE APPLICATIONS
 - 7.2.1 Twin Engine Propeller Driven Airplane
 - 7.2.2 Jet Transport
 - 7.2.3 Fighter
- 8. CLASS I METHOD FOR EMPENNAGE SIZING AND DISPOSITION AND FOR CONTROL
 - 8.1 STEP-BY-STEP METHOD FOR EMPENNAGE SIZING AND DISPOSITION AND FOR CONTROL
 - 8.2 EXAMPLE APPLICATIONS
 - 8.2.1 Twin Engine Propeller Driven Airplane
 - 8.2.2 Jet Transport
 - 8.2.3 Fighter
- 9. CLASS I METHOD FOR LANDING GEAR SIZING AND DISPOSITION
 - 9.1 CLASS I METHOD FOR LANDING GEAR SIZING AND DISPOSITION
 - 9.2 EXAMPLE APPLICATIONS
 - 9.2.1 Twin Engine Propeller Driven Airplane
 - 9.2.2 Jet Transport
 - 9.2.3 Fighter
- 10. CLASS I WEIGHT AND BALANCE ANALYSIS
 - 10.1 CLASS I WEIGHT AND BALANCE METHOD
 - 10.2 EXAMPLE APPLICATIONS
 - 10.2.1 Twin Engine Propeller Driven Airplane
 - 10.2.2 Jet Transport
 - 10.2.3 Fighter
- 11. CLASS I METHOD FOR STABILITY AND CONTROL ANALYSIS
 - 11.1 STATIC LONGITUDINAL STABILITY (LONGITUDINAL X-PLOT)
 - 11.2 STATIC DIRECTIONAL STABILITY (DIRECTIONAL X-PLOT)
 - 11.3 MINIMUM CONTROL SPEED WITH ONE ENGINE INOPERATIVE
 - 11.4 EXAMPLE APPLICATIONS
 - 11.4.1 Twin Engine Propeller Driven Airplane
 - 11.4.2 Jet Transport
 - 11.4.3 Fighter
- 12. CLASS I METHOD FOR DRAG POLAR DETERMINATION
 - 12.1 STEP-BY-STEP METHOD FOR DRAG POLAR DETERMINATION
 - 12.2 EXAMPLE APPLICATIONS
 - 12.2.1 Twin Engine Propeller Driven Airplane
 - 12.2.2 Jet Transport
 - 12.2.3 Fighter
- 13. THE RESULT OF PRELIMINARY DESIGN SEQUENCE I: THE PRELIMINARY

**Airplane Design Part II:
Preliminary Configuration design and Integration of the Propulsion System
Table of Contents**

- 13.1 CLASS I THREEVIEW AND GEOMETRIC SUMMARY FOR A TWIN ENGINE
PROPELLER DRIVEN AIRPLANE
- 13.2 CLASS I THREEVIEW AND GEOMETRIC SUMMARY FOR A JET TRANSPORT
- 13.3 CLASS I THREEVIEW AND GEOMETRIC SUMMARY FOR A FIGHTER
