

# **Airplane Design Part IV: Layout Design of Landing Gear and Systems Table of Contents**

- TABLE OF SYMBOLS
- ACKNOWLEDGEMENT
- 1. INTRODUCTION
- 2. LANDING GEAR LAYOUT DESIGN
  - 2.1 FUNCTION OF LANDING GEAR COMPONENTS
  - 2.2 DISCUSSION OF LANDING GEAR TYPES
  - 2.3 COMPATIBILITY OF LANDING GEAR AND RUNWAY SURFACE: DETERMINATION OF ALLOWABLE WHEEL LOADS
    - 2.3.1 Nosegear Steering Loads
    - 2.3.2 Gear Loads From A Surface Viewpoint
      - 2.3.2.1 Allowable gear loads for Type 1 surfaces
      - 2.3.2.2 Allowable gear loads for Types 2 and 3 surfaces
  - 2.4 TIRES: TYPES, PERFORMANCE, SIZING AND DATA
    - 2.4.1 Tire Types, Tire Construction, and Tire Descriptions
    - 2.4.2 Tire Performance: Load, Deflection and Shock Absorption Capability
    - 2.4.3 Tire Clearance Requirements
    - 2.4.4 Tire Sizing Procedure
    - 2.4.5 Tire Data
  - 2.5 STRUT-WHEEL INTERFACE, STRUTS AND SHOCK ABSORBERS
    - 2.5.1 Strut-Wheel Interface
    - 2.5.2 Devices Used For Shock Absorption
    - 2.5.3 Shock Absorption Capability of Tires and Shock Absorbers: Sizing of Struts
  - 2.6 BRAKES AND BRAKING CAPABILITY
    - 2.6.1 Braking and Brakes
    - 2.6.2 Brake Actuation
  - 2.7 DESIGN CONSIDERATIONS FOR LANDING GEARS OF CARRIER BASED AIRPLANES
    - 2.7.1 Description of Flight Deck Features
    - 2.7.2 Description of a Catapult System
    - 2.7.3 Catapulting Procedures and Required Landing Gear Provisions
    - 2.7.4 Description of Arresting Gear System
    - 2.7.5 Arresting Procedures and Required Landing Gear and Arresting Hook Provisions
  - 2.8 REVIEW OF LANDING GEAR LAYOUT GEOMETRY
    - 2.8.1 Review of Overall Landing Gear Disposition
    - 2.8.2 Critical Landing Gear Dimensions: Tires, Struts, Drag Links and Side Brace
    - 2.8.3 Landing Gear Layout Checklist
  - 2.9 STEERING, TURN RADI AND GROUND OPERATION
    - 2.9.1 Steering Systems
    - 2.9.2 Turn radii and Ground Operation
  - 2.10 RETRACTION KINEMATICS
    - 2.10.1 Fundamentals of Retraction Kinematics
    - 2.10.2 Location of the Retraction Actuator
    - 2.10.3 Special Problems in Gear Retraction
    - 2.10.4 Examples of Landing Gear Retraction Methods
  - 2.11 EXAMPLE LANDING GEAR LAYOUTS
    - 2.11.1 Fixed Gear Layouts
    - 2.11.2 Retractable Gear Layouts
  - 2.12 UNCONVENTIONAL LANDING GEAR CONFIGURATIONS
    - 2.12.1 Cross Wind Landing Gears
    - 2.12.2 Gears With Driven Wheels
    - 2.12.3 Jump-struts and Ski-jumps
    - 2.12.4 Droppable Gears
    - 2.12.5 Beaching Gears
    - 2.12.6 Skis
    - 2.12.7 Floats

**Airplane Design Part IV:  
Layout Design of Landing Gear and Systems  
Table of Contents**

- 2.12.8 Air Cushion Landing System (ACLS)
- 3. WEAPONS INTEGRATION AND WEAPONS DATA
  - 3.1 AERODYNAMIC DESIGN CONSIDERATIONS
    - 3.1.1 Drag Considerations
    - 3.1.2 Stability and Control Considerations
    - 3.1.3 Separation Considerations
    - 3.1.4 Gun Exhaust Gas Considerations
  - 3.2 STRUCTURAL DESIGN CONSIDERATIONS
  - 3.3 DESIGN FOR LOW RADAR AND INFRARED DETECTABILITY
    - 3.3.1 Design Considerations for Low Radar Detectability
    - 3.3.2 Design Considerations for Low Infrared Detectability
  - 3.4 EXAMPLES OF WEAPON INSTALLATIONS
    - 3.4.1 Examples of Gun Installations
    - 3.4.2 Examples of External Store Arrangements
    - 3.4.3 Example of an Internal Store Installation
    - 3.4.4 Examples of Avionics Installations
    - 3.4.5 Example of Armor Plating
  - 3.5 WEAPON AND MILITARY PAYLOAD DATA
    - 3.5.1 Guns, Gun Pods and Rocket Launchers
    - 3.5.2 Free-Fall Munitions (Bombs) and Ejector Racks
    - 3.5.3 Missiles
    - 3.5.4 External Fuel Stores
    - 3.5.5 Special Purpose Stores
    - 3.5.6 Military Vehicles
- 4. FLIGHT CONTROL SYSTEM LAYOUT DESIGN
  - 4.1 LAYOUT OF REVERSIBLE FLIGHT CONTROL SYSTEMS
    - 4.1.1 Reversible Lateral Flight Control Systems
    - 4.1.2 Reversible Longitudinal Flight Control Systems
    - 4.1.3 Reversible Directional Flight Control Systems
    - 4.1.4 Important Design Aspects of Reversible Flight Control Systems
      - 4.1.4.1 Mechanical design requirements associated with cable systems
      - 4.1.4.2 Mechanical design requirements associated with push-pull (push-rod) systems
      - 4.1.4.3 Efficiency considerations
      - 4.1.4.4 Calculation of cable and/or push-rod forces from control surface hingemoments
      - 4.1.4.5 Control surface hinge moments and control surface tabs and types
      - 4.1.4.6 Aerodynamic balance requirements and control surface gadgets
      - 4.1.4.7 Mass balancing requirements
  - 4.2 EXAMPLES OF REVERSIBLE FLIGHT CONTROL SYSTEMS
  - 4.3 LAYOUT OF IRREVERSIBLE FLIGHT CONTROL SYSTEMS
    - 4.3.1 Actuators (Servos)
      - 4.3.1.1 Operation of hydraulic actuators
      - 4.3.1.2 Operation of electrohydrostatic actuators
      - 4.3.1.3 Operation of electromechanical actuators
    - 4.3.2 Sizing of Actuators
    - 4.3.3 Basic Arrangements of Irreversible Flight Control Systems
      - 4.3.3.1 Hydraulic system with mechanical signalling
      - 4.3.3.2 Hydraulic system with electrical or optical signalling
      - 4.3.3.3 Separate surface control systems with electrical or optical signalling
      - 4.3.3.4 Electromechanical flight control systems
    - 4.3.4 Design Problems With Irreversible Flight Control Systems
    - 4.3.5 Control Routing Through Folding Joints
    - 4.3.6 Iron Birds
  - 4.4 EXAMPLES OF IRREVERSIBLE FLIGHT CONTROL SYSTEMS
  - 4.5 TRIM SYSTEMS

**Airplane Design Part IV:  
Layout Design of Landing Gear and Systems  
Table of Contents**

- 4.6 HIGH LIFT CONTROL SYSTEMS
- 4.7 PROPULSION CONTROL SYSTEMS
- 5. FUEL SYSTEM LAYOUT DESIGN
  - 5.1 SIZING OF THE FUEL SYSTEM
  - 5.2 GUIDELINES FOR FUEL SYSTEM LAYOUT DESIGN
  - 5.3 FIRE EXTINGUISHING SYSTEM
  - 5.4 IN-FLIGHT REFUELING SYSTEMS
  - 5.5 EXAMPLES OF FUEL SYSTEM LAYOUTS
- 6. HYDRAULIC SYSTEM LAYOUT DESIGN
  - 6.1 FUNCTIONS OF HYDRAULIC SYSTEMS
  - 6.2 SIZING OF THE HYDRAULIC SYSTEM
    - 6.2.1 Normal Operation
    - 6.2.2 Emergency Operation
  - 6.3 GUIDELINES FOR HYDRAULIC SYSTEM DESIGN
  - 6.4 HYDRAULIC SYSTEM LAYOUT EXAMPLES
- 7. ELECTRICAL SYSTEM LAYOUT DESIGN
  - 7.1 MAJOR COMPONENTS OF ELECTRICAL SYSTEMS
  - 7.2 SIZING OF ELECTRICAL SYSTEMS
  - 7.3 GUIDELINES FOR LAYOUT OF ELECTRICAL SYSTEMS
  - 7.4 EXAMPLE LAYOUTS OF ELECTRICAL SYSTEMS
- 8. ENVIRONMENTAL CONTROL SYSTEM LAYOUT DESIGN
  - 8.1 PRESSURIZATION SYSTEM
  - 8.2 PNEUMATIC SYSTEM
  - 8.3 AIRCONDITIONING SYSTEM
  - 8.4 OXYGEN SYSTEM
- 9. COCKPIT INSTRUMENTATION, FLIGHT MANAGEMENT AND AVIONICS SYSTEM LAYOUT DESIGN
  - 9.1 COCKPIT INSTRUMENTATION LAYOUT
  - 9.2 FLIGHT MANAGEMENT AND AVIONICS SYSTEM LAYOUT
  - 9.3 ANTENNA SYSTEM LAYOUT
  - 9.4 INSTALLATION) MAINTENANCE AND SERVICING CONSIDERATIONS
- 10. DE-ICING, ANTI-ICING, RAIN REMOVAL AND DEFOG SYSTEMS
  - 10.1 DE-ICING AND ANTI-ICING SYSTEMS
    - 10.1.1 De-Icing Systems
    - 10.1.2 Anti-Icing Systems
  - 10.2 RAIN REMOVAL AND DEFOG SYSTEMS
- 11. ESCAPE SYSTEM LAYOUT DESIGN
  - 11.1 EMERGENCY EXITS AND ESCAPE SYSTEMS FOR COMMERCIAL AIRPLANES
  - 11.2 EMERGENCY EXITS AND ESCAPE SYSTEMS FOR MILITARY AIRPLANES
- 12. LAYOUT DESIGN OF WATER AND WASTE SYSTEMS
  - 12.1 WATER AND WASTE SYSTEMS
  - 12.2 WATER BOMBING SYSTEMS
- 13. SAFETY AND SURVIVABILITY
  - 13.1 HOW SAFE IS SAFE ENOUGH?
  - 13.2 DESIGN FOR SAFETY AND SURVIVABILITY IN COMMERCIAL AIRPLANES
  - 13.3 DESIGN FOR SAFETY AND SURVIVABILITY IN MILITARY AIRPLANES
  - 13.4 THE ROLE OF THE PRELIMINARY DESIGN ENGINEER AND DESIGN MANAGEMENT IN CREATING SAFE AIRPLANES
- 14. REFERENCES
- 15. INDEX
