

**Airplane Design Part VIII:
Airplane Cost Estimation: Design, Development, Manufacturing and Operation
Table of Contents**

TABLE OF SYMBOLS
ACKNOWLEDGEMENT

1. INTRODUCTION
2. COST: DEFINITIONS AND CONCEPTS
 - 2.1 COST, PRICE AND PROFIT
 - 2.2 AIRPLANE PROGRAM, LIFE CYCLE AND LIFE CYCLE COST
 - 2.3 EXAMPLES OF AERONAUTICAL ENTERPRISES
 - 2.4 SOME OBSERVATIONS ON PROFIT AND COST
3. METHOD FOR ESTIMATING RESEARCH1 DEVELOPMENT, TEST AND EVALUATION COST AND A METHOD FOR ESTIMATING PROTOTYPING COST
 - 3.1 AIRFRAME ENGINEERING AND DESIGN COST
 - 3.2 DEVELOPMENT SUPPORT AND TESTING COST
 - 3.3 FLIGHT TEST AIRPLANES COST
 - 3.4 FLIGHT TEST OPERATIONS COST
 - 3.5 TEST AND SIMULATION FACILITIES COST
 - 3.6 RDTE PROFIT
 - 3.7 COST TO FINANCE THE RDTE PHASES
 - 3.8 EXAMPLE APPLICATION OF ESTIMATING RDTE COST
 - 3.8.1 RDTE Cost Input Data
 - 3.8.2 RDTE Cost Calculations
 - 3.9 METHOD FOR ESTIMATING PROTOTYPE PROGRAM COST WITH AN EXAMPLE APPLICATION
4. METHOD FOR ESTIMATING MANUFACTURING AND ACQUISITION COST
 - 4.1 AIRFRAME ENGINEERING AND DESIGN COST
 - 4.2 AIRPLANE PROGRAM PRODUCTION COST
 - 4.3 PRODUCTION FLIGHT TEST OPERATIONS COST
 - 4.4 COST TO FINANCE THE MANUFACTURING PHASE
 - 4.5 PROFIT
 - 4.6 EXAMPLE APPLICATION OF ESTIMATING MANUFACTURING AND ACQUISITION COST
 - 4.6.1 Manufacturing and Acquisition Cost Input Data
 - 4.6.2 Manufacturing and Acquisition Cost Calculations
 - 4.6.3 Determination of Estimated Unit Price
 - 4.7 EFFECT OF SEVERAL DESIGN AND PRODUCTION PARAMETERS ON AIRPLANE ESTIMATED PRICE
5. METHOD FOR ESTIMATING OPERATING COST OF COMMERCIAL AIRPLANES
 - 5.1 METHOD FOR ESTIMATING THE PROGRAM OPERATING COST OF COMMERCIAL AIRPLANES
 - 5.2 METHOD FOR ESTIMATING THE DIRECT OPERATING COST OF COMMERCIAL AIRPLANES
 - 5.2.1 Direct Operating Cost of Flying
 - 5.2.1.1 Crew cost per nautical mile
 - 5.2.1.2 Fuel and oil cost per nautical mile
 - 5.2.1.3 Cost of airplane insurance per nautical mile
 - 5.2.2 Direct Operating Cost of Maintenance
 - 5.2.3 Direct Operating Cost of Depreciation
 - 5.2.4 Direct Operating Cost of Landing Fees, Navigation Fees and Registry Taxes
 - 5.2.5 Direct Operating Cost of Financing
 - 5.3 METHOD FOR ESTIMATING THE INDIRECT OPERATING COST OF COMMERCIAL AIRPLANES: IOC
 - 5.3.1 Indirect Operating Cost for Passenger Service
 - 5.3.2 Indirect Operating Cost for Station Operation
 - 5.3.3 Indirect Operating Cost for Airplane Service, Airplane Control and Freight
 - 5.3.4 Indirect Operating Cost for Promotion, Sales and Entertainment
 - 5.3.5 Indirect Operating Cost for General and Administrative Cost
 - 5.4 EXAMPLE APPLICATION
 - 5.4.1 Ourania Mission Data
 - 5.4.2 Calculation of Direct Operating Cost

**Airplane Design Part VIII:
Airplane Cost Estimation: Design, Development, Manufacturing and Operation
Table of Contents**

- 5.4.2.1 Direct operating cost of flying
- 5.4.2.2 Direct operating cost of maintenance
- 5.4.2.3 Direct operating cost of depreciation
- 5.4.2.4 Direct operating cost of landing fees, navigation fees and registration fees taxes
- 5.4.2.5 Direct operating cost of financing
- 5.4.2.6 Total direct operating cost
- 5.4.3 Calculation of Indirect Operating Cost
- 5.4.4 Calculation of Program Operating Cost
- 5.4.5 Discussion of Results
 - 5.4.5.1 Discussion of DOC results
 - 5.4.5.2 Discussion of program cost results
 - 5.4.5.3 Discussion of DOC trade studies
- 5.5 SOME IMPORTANT OBSERVATIONS ABOUT COMMERCIAL AIRPLANE OPERATING COST
- 6. METHOD FOR ESTIMATING OPERATING COST OF MILITARY AIRPLANES
 - 6.1 PROGRAM COST OF FUEL, OIL AND LUBRICANTS
 - 6.2 PROGRAM COST OF DIRECT PERSONNEL
 - 6.2.1 Program Cost of Aircrews
 - 6.2.2 Program Cost of Direct Maintenance Personnel
 - 6.3 PROGRAM COST OF INDIRECT PERSONNEL
 - 6.4 PROGRAM COST OF CONSUMABLE MATERIALS
 - 6.5 PROGRAM COST OF SPARES
 - 6.6 PROGRAM COST OF DEPOT
 - 6.7 PROGRAM COST OF MISCELLANEOUS ITEMS
 - 6.8 SUMMARY FOR THE DETERMINATION OF THE PROGRAM OPERATING COST OF MILITARY AIRPLANES
 - 6.9 EXAMPLE APPLICATION
 - 6.9.1 Program Operating Cost Components
 - 6.9.2 Program Operating Cost Total
 - 6.9.3 Program Operating Cost per Flight Hour
 - 6.10 SOME OBSERVATIONS ON OPERATING COST OF MILITARY AIRPLANES
 - 6.10.1 Military Service Organization, Typical Airplane Numbers in Service and Reasons for High Operating Cost
 - 6.10.2 Discussion of Operating Cost Distribution
 - 6.10.3 Observations on System Maintainability and Reliability
- 7. EXAMPLE OF LIFE CYCLE COST CALCULATION FOR A MILITARY AIRPLANE
 - 7.1 RESEARCH, DEVELOPMENT, TEST AND EVALUATION COST OF THE ERIS GROUND ATTACK FIGHTER
 - 7.2 MANUFACTURING AND ACQUISITION COST OF THE ERIS GROUND ATTACK FIGHTER
 - 7.3 OPERATING COST OF THE ERIS GROUND ATTACK FIGHTER
 - 7.4 DISPOSAL COST OF THE ERIS GROUND ATTACK FIGHTER
 - 7.5 LIFE CYCLE COST OF THE ERIS GROUND ATTACK FIGHTER
 - 7.6 UNIT COST OF THE ERIS GROUND ATTACK FIGHTER
- 8. AIRPLANE DESIGN OPTIMIZATION AND DESIGN-TO-COST
 - 8.1 TAKEOFF WEIGHT SENSITIVITY
 - 8.2 EXAMPLE COST FUNCTIONS IN AIRPLANE DESIGN
 - 8.2.1 Examples of Performance Cost Functions
 - 8.2.2 Examples of Weight Cost Functions
 - 8.2.3 Examples of Economic Cost Functions
 - 8.2.4 Consistency of, and Conflict Between Cost Functions
 - 8.3 RELATION BETWEEN COST FUNCTIONS AND AIRPLANE DESIGN VARIABLES
 - 8.3.1 Performance Cost Functions
 - 8.3.1.1 Cruise speed as a cost function
 - 8.3.1.2 Cruise range as a cost function
 - 8.3.2 Weight Cost Functions

**Airplane Design Part VIII:
Airplane Cost Estimation: Design, Development, Manufacturing and Operation
Table of Contents**

- 8.3.2.1 Empty weight as a cost function
- 8.3.2.2 Useful load as a cost function
- 8.3.3 Economic Cost Functions
 - 8.3.3.1 Manufacturing cost as a cost function
 - 8.3.3.2 Direct operating cost (DOC) as a cost function
 - 8.3.3.3 Return-on-investment (ROI) as a cost function
- 8.4 DESIGN CONSTRAINTS IN AIRPLANE DESIGN
 - 8.4.1 Design Constraints Related to Airworthiness
 - 8.4.1.1 Example of a performance constraint
 - 8.4.1.2 Example of a handling quality constraint
 - 8.4.1.3 Examples of structural integrity constraints
 - 8.4.1.4 Examples of system reliability and redundancy constraints
 - 8.4.2 Design Constraints Related to Operational Safety
 - 8.4.3 Design Constraints Related to Operational Factors Other Than Safety
 - 8.4.4 Design Constraints Related to Economics
 - 8.4.5 Design Constraints Related to the Infrastructure
 - 8.4.6 Design Constraints Related to Typical Military Requirements
 - 8.4.7 Design Constraints Related to the Environment
- 8.5 RULES FOR EVALUATING COST FUNCTIONS
- 8.6 METHODS FOR DESIGN OPTIMIZATION
- 8.7 EXAMPLES OF DESIGN OPTIMIZATION STUDIES
- 8.8 INTRODUCTION TO THE DESIGN-TO-COST PROBLEM
 - 8.8.1 The Commercial Airplane Net Worth Problem
 - 8.8.2 The Military Airplane Net Worth Problem
 - 8.8.3 The Design-to-Cost Problem
- 8.9 DESIGN GUIDELINES FOR LOWERING COST
- 9. FACTORS IN AIRPLANE PROGRAM DECISION MAKING
 - 9.1 FACTORS INVOLVING FINANCIAL AND/OR FINANCIAL FEASIBILITY
 - 9.1.1 Market Potential
 - 9.1.1.1 Understand the customer and his organization
 - 9.1.1.2 Identify and compare with the competition
 - 9.1.1.3 Identify voids in the market
 - 9.1.1.4 Forecast the size of the market
 - 9.1.1.5 Forecast the net worth of the airplane
 - 9.1.1.6 Decide on ability to produce at a cost below the airplane net worth
 - 9.1.1.7 Identify and contact customer decision makers
 - 9.1.2 Development Cost and Time
 - 9.1.3 Availability a Skilled Work Force
 - 9.1.4 Required Production Investment
 - 9.1.5 Potential for Return on Investment (ROI)
 - 9.2 ACTORS INVOLVING TECHNOLOGICAL FEASIBILITY
 - 9.2.1 Drag Prediction
 - 9.2.2 Loads Prediction
 - 9.2.3 Laminar Flow
 - 9.2.4 Range Prediction
 - 9.2.5 Maximum Speed Prediction
 - 9.2.6 VTOL Capability
 - 9.2.7 New Materials
 - 9.2.8 New Engines
 - 9.2.9 Manufacturing Processes
 - 9.2.10 De-facto Stability
 - 9.2.11 Summary
 - 9.3 FACTORS INVOLVING MANUFACTURING FACILITIES
 - 9.4 FACTORS INVOLVING POLITICAL AND/OR ENVIRONMENTAL FEASIBILITY

**Airplane Design Part VIII:
Airplane Cost Estimation: Design, Development, Manufacturing and Operation
Table of Contents**

- 9.5 LESSONS LEARNED FROM PAST AIRPLANE PROGRAMS
- 10. REFERENCES
- 11. INDEX
- APPENDIX A: AIRPLANE PRICE DATA
 - A1 SAILPLANE PRICE DATA
 - A2 ULTRALIGHT AIRPLANE PRICE DATA
 - A3 AGRICULTURAL AIRPLANE PRICE DATA
 - A4 SINGLE ENGINE PISTON AIRPLANE PRICE DATA
 - A5 MULTIENGINE PISTON AIRPLANE PRICE DATA
 - A6 MULTIENGINE TURBOPROP AIRPLANE PRICE DATA
 - A7 BUSINESS JET AIRPLANE PRICE DATA
 - A8 TURBOPROP COMMUTER AIRPLANE PRICE DATA
 - A9 COMMERCIAL TRANSPORT PRICE DATA
 - A10 MILITARY AIRPLANE PRICE DATA
 - A11 A GENERAL LOOK AT AIRPLANE PRICE DATA
- APPENDIX B: ENGINE PRICE DATA
 - B1 PISTON ENGINE PRICE DATA
 - B2 TURBOPROP ENGINE PRICE DATA
 - B3 PROPELLER PRICE DATA
 - B4 JET ENGINE PRICE DATA
- APPENDIX C: AVIONICS PRICE DATA
 - C1 COMMERCIAL AVIONICS SYSTEMS PRICE DATA
 - C2 MILITARY AVIONICS SYSTEMS PRICE DATA
